

BULLSH*T! — AI-Powered Game Show

BULLSH*T! is a web-based trivia game where you try to catch an AI in a lie. Each round, Claude picks one of four multiple-choice answers and defends it with a confident explanation — but it's lying roughly 30-70% of the time. Your job is to call LEGIT or BULLSH*T, then explain your reasoning. The twist: your explanations are fed back to Claude, which silently adapts its lying strategy to exploit your blind spots. Get fooled and Claude roasts your logic. Catch it three times in a row and the lie rate climbs. Lose all three lives and the session ends with a full log of every round and every adaptation Claude made.
